## REPORT.

---

To the Honorable the Senate and House of Representatives of the State of Louisiana.

In compliance with the law the Board of Administrators of the Charity Hospital respectfully present their annual report.

The number of patients admitted during the year, as will be seen from the clerk's report, is six thousand six hundred and fifty-one. The number discharged five thousand seven hundred and thirty, and the number of deaths eight hundred and ninety-one. In the previous year the number of admissions was seven thousand eight hundred and thirty-seven, and the deaths eleven hundred and eighteen. The deaths from yellow fever the present year are only twenty, in the previous year two hundred and fifty-three.

In examining the expenses of the Hospital for the past year it will be seen that the sum of six thousand and sixty-five dollars and eighty-one cents was spent during the year on repairs. A great deal of the work done was the necessary repairs required to keep the buildings from going to destruction and they injuries done to the roof and chimneys from storms. A successful system of carrying hot water throughout the building has been accomplished the past year, after many previous attempts, ending in complete failure and heavy losses.

✓ Mr. Beckwith, one of the administrators, has succeeded by carrying steam a distance of over four hundred feet to a water-heater on the upper floor of the main building. The water is distributed a distance of three hundred feet and over from the heater, so that an abundant supply of hot water is furnished at a distance of eight hundred feet from its source. This system, it was thought, would not work at all from the great distance and length of the pipe involved in the plan; it has proved, however, a complete success, and for the first time in the history of the institution we are able to say that the patients are furnished with the requisite supply of hot water. This article in the form of baths is absolutely essential for the cure of some diseases, and it is necessary for the comfort and recovery

of all the sick. This valuable, or rather truly invaluable improvement, requiring several thousand feet of pipe with the requisite attachments, etc., has been put into operation at an incredible small expense.

Important repairs are required on the buildings at the present time which cannot well with safety be delayed much longer. One of the wings from the imperfect manner of its construction is considered insecure and unsafe in case of heavy storms or blows; this should be attended to at once, and we would respectfully suggest that the Committee on Charitable Institutions pay the hospital a visit at their earliest convenience and satisfy themselves of the necessity of making some appropriation specially for repairs to the buildings.

It will be seen from the Treasurer's account that the sum of seventy-nine thousand six hundred and twenty-eight dollars and twenty-five cents discount, and fifteen hundred and forty-four dollars and eighty-four cents interest on loans, making eighty-one thousand one hundred and seventy-three dollars and nine cents was lost on the appropriation of one hundred and seventy-five thousand dollars made by the Legislature for the maintenance of the Institution for the past year. We commence the present year with debts amounting to thirty-nine thousand five hundred and ninety-five dollars and sixty five cents. The Treasurer's account will show that supplies to this amount have been furnished to the hospital on credit, and in some cases parties furnishing supplies are required to wait four to six months for payment. This constant indebtedness is a loss to the State, and to the institution, for frequently no objections can be made to the quality or price of materials furnished on credit. The whole cash expense for the past year was only one hundred and twenty thousand eight hundred and twenty-three dollars and eighty-nine cents, and we can safely assume that one hundred and ten thousand would be equal to the sum if all supplies could be purchased for cash and paid for regularly at the end of every month. This is the only satisfactory and economical way of running the institution. When we consider that the Charity Hospital is not only a hospital, but an alms-house for the city of New Orleans, for the State of Louisiana, and we might say for all the surrounding States, that it has to take care of at least one-half of all the marine patients belonging to the port of

New Orleans, which are not provided for by the Treasury Department of the United States Government, owing to the neglect of steamboat and ship masters providing their crews with proper certificates required by the government laws, we cannot consider the cost to the State under these circumstances at all extraordinary.

We ask that the Legislature appropriate the sum of one hundred thousand dollars for the support of the hospital the coming year, and that an additional appropriation be made to pay off the existing indebtedness, and make the necessary repairs required for the safety of the buildings.

[Signed]

JAMES GRAHAM,  
Vice-President.
